Nombre de 3 letras + terminación de 2 letras, para que la URL entre en el QR más pequeño que existe (versión 1, 21 módulos). Se barrieron 118 dominios en los registros (RDAP/WHOIS) y cada uno de esta tabla se comprobó después en la página de compra del registrador, porque la lista pública de precios no muestra los «premium». Precios en USD tal como aparecen en caja el 25 y 26 de septiembre de 2026, sin impuestos. Ninguna de estas terminaciones se vende en Cloudflare Registrar (solo .cc .co .fm .tv .us, todas ocupadas o premium para estos nombres); el DNS y el Worker de redirección sí quedan en Cloudflare.

1. Opciones disponibles a precio normal (93 dominios), ordenadas por lo que cuestan en 3 años
